

## Declaration of Consent to Photo and Film Recordings of your Child and to the Surf Park Regulations

If your child comes to the surf park o2 SURFTOWN MUC with you, another adult or unaccompanied by an adult for surfing or bodyboarding, we not only want to offer them great surf or bodyboard sessions, but also make their day with us an all-round experience from which they can also take photos or videos of their rides home with them. We therefore ask you to give your consent below for us to take, edit, store, show and make available to the public photos and videos of your child. With your signature, you also declare that you agree to your child visiting the surf park, that you have taken note of our surf park regulations (<https://surftown.de/en/surfpark-regulations>) and that you have informed your child of their content, the obligation to comply with them and, in particular, the risks of surfing and bodyboarding.

We have the entire surf or bodyboard session photographed by a photographer and filmed by a video system installed at the wave pool. All surfers and bodyboarders are photographed or recorded on video and then the respective images and videos are individually assigned to your child and the other participants in your child's surf or bodyboard session with the help of the software-based evaluation of the participants' physical characteristics. In this way, with the support of artificial intelligence, we create a photo and video file from your child's rides in the respective surf or bodyboard session, which contains only recordings of your child ("Session Film"), and store the Session Film for a period of 4 days on a platform that is only publicly accessible to a limited extent ("Platform"). Following your child's surf or bodyboard session, we will show the Session Film on monitors or similar devices in the surf park and send you an email with an internet link to the Platform, which you can use to watch the Session Film with your child and then decide to purchase it. Via a corresponding link, all other participants in your child's surf or bodyboard session also have access to all files stored on the Platform for this surf or bodyboard session, which we create in the aforementioned manner for each participant in the surf or bodyboard session. They could therefore also access the Session Film intended for your child. We will ask all participants to view and purchase only the surf or bodyboard session film that contains the footage of the respective participant. However, we cannot guarantee that all participants will adhere to these guidelines. However, please be assured that neither your nor your child's name or any other personal data of you or your child will be published by us, not even as source text to the photos and/or videos. We will not publish the photos or videos of your child's rides or their Session Film in print media, on websites, in social media or other publications, nor will we use them for advertising or marketing purposes. The Session Film with the recordings of your child will be automatically deleted after the storage period of 4 days has expired.
